COMPANY OVERVIEW

CJ Anatole LLC is a Georgia-based small business built specifically for subcontracting partnerships in public-sector and institutional facility support.

We coordinate janitorial, grounds, environmental, and vendor scheduling services for prime contractors operating in the greater Atlanta metro and North Georgia region — handling the communication, documentation, and local vendor management that keeps facility scopes on track and off the prime's plate.

Fully registered and compliant — active SAM, CAGE code, UEI, and DUNS on file. Self-certified Small Disadvantaged Business (SDB) reflected in SAM.gov registration.

DIFFERENTIATORS

- **Regionally Rooted, Federally Compliant** — Georgia-based and positioned to support federal and municipal facilities in the greater Atlanta metro, including Fort Gillem, Dobbins ARB, and VA facilities across North Georgia. Active SAM registration, CAGE code, and UEI — compliant and ready day one.
- **Coordination-to-Completion Accountability** — We own the communication loop from tasking through closeout, including documentation that meets public-sector reporting standards. Primes get fewer follow-up calls and cleaner records.
- **Lean and Responsive by Design** — As a small business, decisions don't go through layers. When scope changes or a prime needs fast vendor sourcing, we move same-day. No hand-offs, no delays.
- **Qualified Local Vendor Network** — Active relationships with licensed, insured local service providers across janitorial, grounds, and environmental services in the North Georgia region. We vet and coordinate — primes don't inherit vendor risk.
- **Built for Subcontracting Partnerships** — Structured specifically to support prime contractors meeting small business subcontracting plan requirements. We understand reporting cadence, documentation expectations, and teaming dynamics.

CORE COMPETENCIES
